Professional Experience

Transaction Coordinator, JPAR Legacy Group

2022 – present | Winston Salem, NC

- Prepared real estate listings on MLS
- Communicated with clients, agents, contractors, inspectors, etc. to set up meetings for agents
- Prepared documents to be signed by any involved parties
- Ensured transactions stayed within the intended time frame

Mobile AT&T Expert, Best Buy

2017 – 2020 | Winston Salem, NC

- Activated devices on the AT&T network
- Recommended products and solutions based on customers' specific needs
- Trained other employees on promotions and bundles related to AT&T
- Met goals for number of activations, individual units, and related services
- Set up product displays/demos and replaced/updated signage
- Selected orders for customer pickup

Trainer, Chick-fil-A

2015 – 2018 | Winston Salem, NC

- Safely and efficiently handled customers' orders
- Stayed up to date on current prices and discounts in relation to menu items
- Trained new employees on how to correctly and safely follow store procedures and health regulations

Courses

.NET Coding Bootcamp, Coder Foundry

01/2023 – 03/2023 | Kernersville, NC

A full-time coding bootcamp where I built 3 full-stack web applications using ASP.NET Core with C#, JavaScript, and HTML, as well as 6 smaller front-end apps using JavaScript, HTML, and CSS (Bootstrap).

All of these applications have been published with Netlify or Railway and have a live demo accessible from my portfolio [🔗](#)

Projects

Bug Tracker

A full-stack ticket management system designed for use by companies working on projects with multiple team members. Each company has multiple roles for admins, project managers, developers, and submitters. The dashboard shows information about active projects and tickets, as well as their status and priority level.

Blog

A full-stack personal blog application. The author is able to create and edit posts with a rich text editor and add images, tags, and categories to make the posts easily filterable. Readers view articles anonymously or sign in to leave a comment. The blog also has an API which is used to display the articles on my portfolio.

Contact Manager

A full-stack contact manager application. Users can add contacts and categories which are shown in a searchable list. Each contact can be emailed directly from the app, and group emails can be sent to all contacts in a category.
